#### Option

 Description
 Part no.

 Bracket
 DXT152-25-1A (With screw)

## VT307 Series

#### **∧** Caution

Make sure that dust and/or other foreign materials do not enter the valve from the unused port (e.g. exhaust port).

#### Standard Specifications

Type of actuation		Dire	ct operated type 2 position single solenoid				
Fluid		Air					
Operating pressure range	0 t	0 to 1 MPa (High-pressure type), 0 to 0.7 MPa (Standard type)					
Ambient and fluid temperature	e		-10 to 50°C (No freezing)				
Response time Note 1)			20 ms or less (at 0.5 MPa)				
Max. operating frequency			10 Hz				
Lubrication	No	ot required	d (Use turbine oil Class 1 ISO VG32, if lubricated.)				
Manual override			Non-locking push type				
Mounting orientation		Unrestricted					
Impact/Vibration resistance No	te 2)	150/50 m/s <sup>2</sup>					
Enclosure		Dustproof					
Electrical entry		Grommet, DIN terminal					
Coil rated voltage (V)	AC (5	0/60 Hz)	100, 200, 110*, 220*, 240*				
Coll fated voltage (v)	1	DC	24, 12*				
Allowable voltage fluctuation			-15 to +10% of rated voltage				
Apparent power Note 3) Note 4)	AC	Inrush	12.7 VA (50 Hz), 10.7 VA (60 Hz)				
Apparent power		Holding	7.6 VA (50 Hz), 5.4 VA (60 Hz)				
Power consumption Note 3) Note 4)		DC	Without indicator light: 4 W, With indicator light: 4.2 W				
Light/Surge voltage suppressor		AC	Varistor, LED				
(DIN terminal type only)		DC	Diode, LED				

<sup>\*</sup> Semi-standard

Note 1) Based on dynamic performance test, JIS B 8419: 2010. (Coil temperature: 20°C, at rated voltage, without surge voltage suppressor) Note 2) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction

and at the right angles to the main valve and armature in both energized and

de-energized states every once for each condition. (Values at the initial period) Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 1000 Hz. Test

was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial

period)

Flow Rate Characteristics/Weight

Note 3) At rated voltage period Note 4) The value is different for continuous duty type (VT307E), and energy-saving type (VT307Y/W). Refer to "Valve Options" shown below.

	Port		Flow rate characteristics											
Valve model		$1 \rightarrow 2 (P \rightarrow A)$		$2 \rightarrow 3 (A \rightarrow R)$		$3 \rightarrow 2 (R \rightarrow A)$			$2 \rightarrow 1 (A \rightarrow P)$			Weight		
	size	C[dm3/(s·bar)]	b	Cv	C[dm3/(s·bar)]	b	Cv	C[dm3/(s·bar)]	b	Cv	C[dm <sup>s</sup> /(s·bar)]	b	Cv	Grommet
VT307		0.71	0.35	0.18	0.68	0.27	0.17	0.65	0.36	0.17	0.63	0.35	0.17	
VT307V (Vacuum spec. type)		0.71	0.35	0.18	0.00	0.27	0.17	0.65	0.30	0.17	0.63	0.35	0.17	
VT307E (Continuous duty type)	1/8													
VT307Y (Energy-saving type)		0.41	0.26	0.10	0.44	0.35	0.11	0.48	0.27	0.12	0.35	0.33	0.10	
VT307W (Energy-saving, Vacuum spec. type)														0.15 kg
VT307		0.71	0.31	0.19	0.71	0.25	0.17	0.68	0.33	0.17	0.71	0.26	0.18	0.15 Kg
VT307V (Vacuum spec. type)		0.71	0.31	0.19	0.71	0.25	0.17	0.00	0.33	0.17	0.71	0.20	0.10	
VT307E (Continuous duty type)	1/4													
VT307Y (Energy-saving type)		0.49	0.20	0.12	0.44	0.34	0.11	0.48	0.17	0.12	0.46	0.28	0.11	
VT307W (Energy-saving, Vacuum spec. type)														

Note) Values for a single valve unit. It is not applicable to the manifold. Refer to the manifold specifications on page 1437.

#### Valve Options

#### Continuous duty type: VT307E

Exclusive use of VT307E is recommended for continuous duty with long time loading.

#### ▲ Caution

- 1. This model is for continuous duty, not for high cycle rates. But even in low cycle rates, if energizing the valve more than once a day, please consult with SMC.
- 2. Energizing solenoid should be done at least once in 30 days.

Specifications different from standard are as follows.							
		7.9 VA (50 Hz), 6.2 VA (60 Hz)					
AC	Holding	5.8 VA (50 Hz), 3.5 VA (60 Hz)					
Power consumption/DC	1.8 W, With indicator light: 2 W						
Response time Note)	30 ms or less (at 0.5 MPa)						
Note) Refer to Note 1) of the standard specifications.							

Energy-saving type: VT307Y (VT307W)

If low power consumption is required for electronic control, "VT307Y(W)" (1.8 W) is recommended.

Specifications different from standard are as follows. Power consumption/DC 1.8 W, With indicator light: 2 W Response time Note) 25 ms or less (at 0.5 MPa) Note) Refer to Note 1) of the standard specifications.

@SMC

#### Vacuum spec. type: VT307V (VT307W)

This vacuum model has less air leakage than the standard model under low pressure. It is recommended for vacuum application.

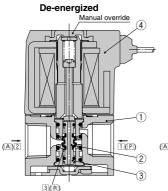

#### ▲ Caution

Since this valve has slight air leakage, it can not be used for vacuum holding (including positive pressure holding) in the pressure container.

Specifications different from standard are as follows. Operating pressure range -101.2 kPa to 0.1 MPa

#### 3 Port Solenoid Valve Direct Operated Poppet Type **VT307** Series

#### Construction

Poppet valve ② is pushed upward by the return spring ③, port ① is closed. Then, port ② and port ③ are connected. Air flow direction:

Port  $1 \leftrightarrow \text{Block}, 2 \leftrightarrow 3$ 

#### **Component Parts**

Energized
<enorgized></enorgized>

<Energized>

When energizing the molded coll ③, the armature ③ is magnetically attracted to the core (6), and through the push rod (7), it pushes down the poppet valve (2) and port (3) is closed. Then, port (1) and port (2) are connected. At this time, there will be gaps between the armature (5) and the core (6), but the armature (5) will be magnetically firmly attracted to the core (6).

Port 1  $\leftrightarrow$  Port 2, Port 3  $\leftrightarrow$  Block

#### No. Description Material Note 1 Body Aluminum die-casted Color: White Aluminum, HNBR 2 Poppet valve Stainless steel 3 Return spring 4 Molded coil Resin

#### How to Use DIN Terminal

#### 1. Disassembly

- After loosening the screw ①, then if the housing ② is pulled in the direction of the screw ①, the connector will be removed from the body of equipment (solenoid, etc.).
   Pull the screw ① out of the housing ②.
- 2) Plum the screw () out of the nousing (2, 3) On the bottom part of the terminal block (3), there's a cut-off part (9). If a small flat head screwdriver is inserted between the opening in the bottom, terminal block (3) will be removed from the housing (2).
- Remove the cable gland (4), plain washer (5) and rubber seal (6).

#### 2. Wiring

- Pass the cable ⑦ through the cable gland ④, plain washer ⑤ and rubber seal ⑥ in this order, and then insert them into the housing ②.
- 2) Loosen the screw ① attached to the terminal block ③. Then, pass the lead wire ① through the terminal block ③ and tighten the screw ① again. Note 1) Tighten within the tightening torque of 0.5 N·m ±15%.
- Note 2) Cable () outside diameter: ø6 to ø8 mm (ø4.5 to ø7 mm for CE-compliant products) Note 3) Crimped terminal like round-shape or
- Y-shape cannot be used.

#### Connector for DIN Terminal, Gasket

Description	Part no.
DIN connector	B1B09-2A (Standard)
	GM209NJ-B17 (CE-compliant)
Gasket	CAXT623-6-7-12 (Standard)
Gasket	CAXT623-6-7-11 (CE-compliant)

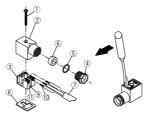

#### 3. Assembly

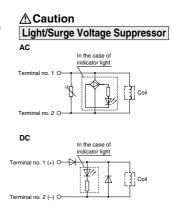

- Pass the cable ⑦ through the cable gland ④, plain washer ⑤ and rubber seal ⑥ in this order and connect to the terminal block ③. Then, mount the terminal block ③ on the housing ②.
   (Push it down until you hear the click sound.)
- 2) Put the rubber seal 6 and plain washer 5 in this order into the cable entry of the housing 2, and then tighten the cable gland 4 securely.
- 3) Insert the gasket (8) between the bottom part of terminal block (3) and the plug attached to the equipment. Then, screw in (1) from the top of the housing (2) to tighten it.

Note 1) Tighten within the tightening torque of 0.5  $$\rm N$\cdot m \pm 20\%$.$ 

#### Changing the entry direction

The orientation of a connector can be changed 180°, depending on the combination of a housing (2) and a terminal block (3).

#### Electrical Connection

DIN terminal is connected inside as in the figure below. Connect to the corresponding power supply.

#### DIN terminal block

## VT307 Series Manifold Specifications

VT307 manifold is available both as a common exhaust and individual exhaust model.

Manifold valve can be easily converted from N.C. (Normally Closed) to N.O. (Normally Open) merely by turning over the function plate.

Manifold Specifications

Manifold ty	pe		B mount									
Max. numb	er of stations		20 stations Note)									
Applicable	solenoid valve		VO307□-□□□□ (-Q)									
Exh	aust port		Port location (Direction)/Port size									
Symbol	Туре	Р	Р		Α	R						
2	Common		Base (Side) 1/8				ise (Side) 1/8	Base (Side) 1/8				
3	Individual	Base (	Base (Side) 1/4		ise (Side) 1/8, 1/4	Base (Top) 1/8						

Note) For 6 stations or more, supply air both sides of P port. The common exhaust type should exhaust from both of the R port.

#### Option

Description	Part no.
Blanking plate (With gasket, screw) Note)	DXT060-51-13 <sup>A</sup>

#### Accessories for Applicable Solenoid Valve

Description	Part no.	Qty.

## VT307 Series Specific Product Precautions

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages 3 to 9 for 3/4/5 Port Solenoid Valve Precautions.

#### Mounting

## **M**Warning

When mounting a valve on the manifold base, N.C. and N.O. can be reversed by the function plate orientation. Also, since the cylinder operates in reverse, confirm if the function plate is correctly mounted or not.

## 

- Each valve is fixed to the manifold base with two M4 mounting screws. Tighten the screws firmly when re-mounting.
- 2. For mounting, tighten M4 or equivalent screws evenly into the mounting holes of the manifold base.

Tightening torque of the mounting screw (M4): 1.4 N·m

#### Changing from N.C. to N.O.

### **≜**Caution

This product is delivered as N.C. valve.

If N.O. valve is required, remove mounting screws of the required valve and turn over the function plate. (Make sure that there are gaskets on both sides of the plate.) Then, tighten the mounting screws to fix the valve to the manifold base.

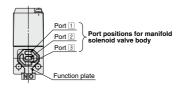

Figure: For N.C.

Specifications	Function plate					
N.C.	No mark					
N.O.	NO					

Piping

## **≜**Caution

 For the common exhaust type, pressurization or evacuation of the 3(R) port can cause a malfunction.
